

Flatbeds

*For your future
convenience*

THE PORTABLE TOILET CARRYING FLATBED

This flatbed trailer has been specially designed by New World Toilets Ltd. to carry portable toilets easily and safely. It has a low bed height for ease of loading. The standard set up comprises a twin axial three tonne gross weight arrangement with a fixed front, rear and off-side frame. An optional removable centre rail (as shown above) is also available depending on your requirements.

Our standard trailer models are as follows;

20' x 7'6" (6.10 x 2.30m) 3000kg gross weight, twin axle
23' x 7'6" (7.00 x 2.30m) 3000kg gross weight, twin axle
(note: the non-standard triple axle option is shown)

PORTABLE TOILET CARRYING FLATBED

Standard specification

- Fully welded construction then hot dipped galvanised.
- Low bed height, approx 650mm.
- Full beam galvanised, rubber torsion axles.
- Cast coupling supplied with either 40mm eye or a 50mm ball, with serrated jockey wheel.
- All trailers are fitted with 195/50 R13 tyres
- 14mm rope hooks are welded all around the trailer for use in securing the portable toilets.
- Full 12v road legal lighting (24v on commercial spec).
- 18mm resin bonded phenolic plywood floor.
- Fixed framework for headboard, offside and rear.
- Twin axle at 3000kg gross weight.
