

*For your future convenience*

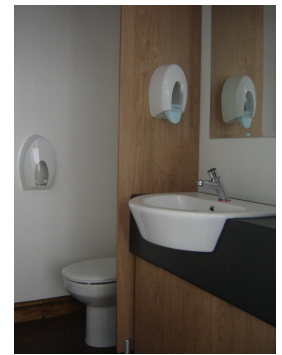

# THE LUXURY TOILET

A high quality interior ensures that the right impression is made on those special occasions. The comfort and satisfaction of the customer being the first consideration, but with attention to the layout to assist servicing and maintenance.

As with the Event range, the Luxury range has been designed and manufactured specifically for the job (including the chassis). Our trailer design and manufacture experience ensures we produce units with outstanding strength and excellent towing characteristics (due to our purpose built combined chassis and tank system).

The Luxury range is available in 2 levels of specification:

- **Luxury** specification for the more prestigious events.
- **Luxury Plus** specification for the ultimate in luxury. (high spec. purpose built vanity units and designer basins)

The toilets are running on a re-circulating system with high quality 240V pumps and filters (12V option).

A vacuum toilet system version is available.

Standard sizes:

- 1+1
  - 3+1 with 2 urinals
- (other sizes available on request)
